ARBITAO

DECENTRALIZING ARBITRAGE

**The New Way of
Arbitrage Trading**

ten pager

What is Arbitao?

Arbitao is a sophisticated Arbitrage Platform that aggregates liquidity from customers and uses it for arbitrage trading.

Problem

Lots of pairs are facing lack of liquidity and the volatility in the market is very high which leads to price differences between exchanges. By monitoring different exchanges, it can be seen that price spreads of certain pairs are up to 5%.

Method

Arbitrage is a method to take advantage of price spreads between different exchanges and markets. It is an essential force for efficiency in asset pricing because it balances price discrepancies, adds liquidity and mitigates volatility.

Key Features

Automated Arbitrage Trading

ATAOwallet with integrated cloud computing feature

Unique infrastructure to reduce latency by x100

Instrument for lowering volatility and increasing liquidity

TAOx for easy, safe and cheap exchange

Solution

Arbitao has built a unique infrastructure which is reducing latencies to execute arbitrage trades as fast as possible. Furthermore, the Arbitao Team has developed specialized algorithms, which monitor the market to find the most profitable trades. The ATAO Blockchain is made to build a system of decentralized trade execution. Moreover, Arbitao is developing a feature which will be integrated into the wallet, where ATAO-Coin holders can contribute computing power, which will help to find even more profitable trades.

Spot Arbitrage Opportunity

Price difference between exchanges increases

Reduce Volatility

Arbitrage makes the crypto market as a whole more stable

Execute Trades Automatically

Realise profits without any risk of price speculation

Beneficial Side-effect!

Distribute Profits

ATAO investors earn their share of the profits daily

Raise Liquidity

More capital allows us to realise even more profitable trades

Grow Network

New users join Arbitao and the demand for ATAO increases

What is Arbitao?

The ATA0 Ecosystem

The Ecosystem of Arbitao consists of the three elements.

The 3 pillars of Arbitao

TAOx

TAOx is the place where ATA0 can be sold for or bought with Bitcoin. It is the first exchange where ATA0 is traded. You can withdraw your funds to wallets, or use them to invest in the Arbitao arbitrage trading platform.

Arbitao

Arbitao is synonymous with its arbitrage trading platform. Join a pool that fits your preferred investment size and let your ATA0 passively work for you. You can move your profits to TAOx, when you want to exchange them, or to your personal ATA0wallet.

ATA0 Wallet

This is the official ATA0 wallet that allows you to earn further ATA0 by staking your coins. As Arbitao grows and reaches milestones, this wallet will be the first application to support new features such as cloud computing.

How To Profit

Arbitao Arbitrage Platform Investment!

How do you benefit?

By investing money in ATAO you will benefit from the arbitrage system when the softcap is reached. This will give you daily interest rates from 0.5% to 0.75%.

Why is it possible?

Arbitao is a successful tested product which is proofed by the initial investors. These investors are already making profits since November 2017. You can check all trades and the profit calculator on the Arbitao website.

Invest: \$1001 - \$5000
Daily Interest Rate*: 0.6%
Period: 190 days
[Join Silver Pool](#)

Gold Pool
Invest: \$5001 - \$10.000
Daily Interest Rate*: 0.7%
Period: 150 days
[Join Gold Pool](#)

Platinum Pool
Invest: \$10.000 +
Daily Interest Rate*: 0.75%
Period: 120 days
[Join Platinum Pool](#)

Invite Your Friends!

How do you benefit?

By inviting your friends you will profit with up to 18% of their investments.

Why is it possible?

Arbitao is focusing on the community and wants to build a strong support system. Therefore, we are rewarding the customers by helping to expand the community. So Arbitao is able to reduce the Marketing expenses and to accelerate the business growth. In this sense both the customer and Arbitao will benefit.

How To Profit

Staking!

How do you benefit?

You have to put your ATAO Coins into the ATAOwallet and you will be rewarded with extra ATAO Coins.

Why is it possible?

Having ATAO in your wallet will accelerate the decentralization of the system and validate the transactions. For every transaction on the ATAO Blockchain, a fee will be paid. This fee will partially be granted among all stakers.

Month staking reward (monthly interest)

Month	Staking Reward (Monthly Interest)
1	5%
2	4%
3	3%
4	2%
5-12	1%
12-24	0.8%
>24	0.58333% (7% per annum)

After one year, the staking rewards are set to 0.8% interest per month for the duration of one year. After that, it is permanently fixed to 7% interest per year. This will accelerate the decentralization of the blockchain.

ATAOwallet with Integrated Cloud Computing Feature!

How do you benefit?

Arbitao offers an integrated ATAOwallet feature which will allow supporters to contribute computing power for calculations of profitable arbitrage chains in the given solution room.

Why is it possible?

The more supporters for cloud computing the more profitable trades can be performed as more pairs and exchanges can be added to the algorithm.

How To Profit

ATAO value increase!

How do you benefit?

When ATAO is listed on exchanges, the demand for the Coins will rise which will increase the Price.

Why is it possible?

When the crypto community realises the working product, the demand will surge. By expanding our business and adding more partnerships the trust will rise even more and the value of ATAO will grow.

Dashboard

Here you are able to monitor the live feed of executed trades.
